

PROCEDURE

Number	Name	Date
GPC0002	Setting an Association	07/01/2014

How to set an association between a file type (gc8 files) and a program (viewer8.exe). After the association is set, whenever a gc8 process map file is double-clicked, it will open in the viewer8 program.

Performed by

Process Mapper

Action

1. **Open Windows Explorer. (One way to open Windows Explorer is to use the shortcut keys Windows Logo+E.)**
2. **Browse to the graham chart folder. (This is the folder where you copied the viewer files.)**
3. **Right click on any "*.gc8" chart file to display the right click menu.**
4. **Mouse over the "Open with" menu option and select "Choose default program..." to display the "Open with" window.**
5. **Click the Browse button to open the Browse window.**
6. **Browse to the Viewer8 folder and double-click "viewer8.exe" to add viewer8.exe to the list of "Open with" programs. Make sure the "Always use the selected program to open this kind of file" checkbox is checked then click the OK button.**
7. **Double-click on a chart file to open it in Viewer8.**
